

## Investment Firm West Coast Office

Undisclosed Client

Industry: Private Global Investment Firm

Location: San Francisco, CA

### Challenge:

Three years after the initial project, our client was expanding and moving into larger Financial District office space.

Our primary project goal was to create an environment that reflected the refined taste and sophisticated nature of a successful Private Equity firm.

We were also tasked to seamlessly blend in as much of the client's existing product as possible.

### Solution:

Staying with the original product and color palettes, CSG's design team re-deployed nearly 80% of the client's existing Allsteel and Gunlocke products, adding additional components and products as necessary.

Allsteel and Gunlocke's non-obsolence policies insured that exact matches to existing finishes and products were available.

Products Used:

Workstations: DNA

Offices: Menu

Board Room: Converge

This project's largest challenge was logistics. To insure minimal client downtime, all work had to be completed between 3PM Friday and 1PM Sunday.

New product needed to arrive at the jobsite in conjunction with the existing product, to insure all work could be completed on time.

Finally, CSG design staff had no room for error in their technical furniture plan, which combined existing inventory with new components.

Exhaustive planning and attention to detail insured that this project came off smoothly, with no client downtime, and no outstanding punch items.
